

XI. Table of figures

Figure 3.1. Trends of macronutrients in different aboveground parts of five tree and shrub species. Error bars are SEM with n=15.....	20
Figure 4.1. Trends of available P under five tree and shrub species at different soil depth and horizontal positions. Horizontal bars show standard errors of the mean.....	30
Figure 4.2. Trends of CEC of the soil under five tree and shrub species at different soil depths and horizontal positions. Horizontal bars show standard errors of the mean	32
Figure 4.3. Trends of base saturation of the soil under five tree and shrub species at different	33
Figure 5.1. Tree species evaluated on a Vertisol area of Ginchi, central Ethiopia (a) mean height and (b) mean height increment	42
Figure 5.2. Trends of total N at 12 and 40 months under different trees on a Vertisol area.....	44
Figure 5.3. Trends of available P at 12 and 40 months under different trees on a Vertisol...	45
Figure 6.1. Trends of total N at 12 and 64 months under planted seven tree species on Nitosols of Holetta. Horizontal bars show.....	56
