

B. GEOGRAPHISCHES REGISTER

Das geographische Register enthält die thematisch relevanten geographischen Namen im weitesten Sinn von der Antike bis in die neueste Zeit unter Berücksichtigung zahlreicher überlieferter schriftlicher Varianten. Aufgenommen sind im Besonderen auch die von den Namen Heiliger abgeleiteten Namen von Klöstern, Kirchen, Kapellen, Fluren etc. (Patrozinien). Verwiesen wird selbstverständlich auf die Seiten der vorliegenden beiden Bände von *TIB* 11; das gilt natürlich auch dann, wenn es, wie bei Verweisen auf andere *TIB*-Bände, auf den ersten Blick nicht so aussehen mag (z. B. Thasos, Insel, *TIB* 10, 11). An dieser Stelle sei an die Doppelfunktion der Abkürzung „s.“ erinnert: Sie kann je nach Zusammenhang sowohl „siehe“ bedeuten als auch „südlich“ (z. B. s. von *Kastoria*). Für Lemmata gelten zwei Besonderheiten: Erstens sind die Nummern der Seiten, auf denen sie behandelt werden, **fett** gedruckt. Zweitens sind sie zumeist mit Hinweisen auf ihre Lage und mit entsprechenden aktuellen Ortsnamen versehen. Gleichnamige Lemmata sind mit Nummern in der Reihenfolge von West nach Ost bezeichnet. Der Lageangabe für die Stichwörter dient in der Regel der Bezug auf die Hauptstadt des jeweiligen heutigen griechischen Verwaltungsbezirkes (Nomos) oder auf einen anderen zentralen Ort (z. B. Amphipolis, Aridaia, Nestorion, Nigrita, Ptolemaïs, Rodolibos). In diesen Fällen wurde zur Erleichterung der Benützung oft dem aktuellen Namen gegenüber dem thematischen der Vorzug gegeben (also Phlōrina statt Chlerēnos, Kabala statt Christupolis, Rodolibos statt Radolibus, Sithōnia statt Longos). Als Lemmata geführte historische Ortsnamen, die im Register ohne Hinweis auf ihre Lage aufscheinen, sind in der Regel Namen von Festungen in Makedonien, die nur in dem von Prokopios überlieferten Katalog genannt sind und bislang nicht lokalisiert wurden. Auf die große Masse der Siedlungs-, Flur-, Klöster-, Kirchen-, Landschafts-, Gewässer- und Heiligennamen unter den Stichwörtern des geographischen Registers folgen, in runde Klammern gesetzt, zumeist die Namen der Lemmata, unter denen sie genannt werden bzw. auf die sie Bezug haben. Das dient als Orientierungshilfe bei der Benützung des Registers und als Grundlage für die alphabetische Anordnung namensgleicher Stichwörter. In Klammern finden sich also in der Regel einerseits Namen von Lemmata und andererseits Zahlen zur Reihung gleichnamiger Stichwörter. Ein dem Stichwort nachgesetzter Asterisk * bedeutet, dass lediglich eine Auswahl vorliegt.

Nicht aufgenommen wurden folgende Arten geographischer Namen:

Ortsnamen, die Bestandteile von Personennamen (Cyriacus von *Ancona*) oder Sachbezeichnungen (Synode von *Serdica*, Codex von *Zaborda*, Prothesis des Klosters *Barlaam der Meteōra*) sind.

Ortsnamen und geographische Begriffe, die lediglich der ungefähren Beschreibung der Lage eines Ortes dienen; ausgenommen sind hier Ortsnamen in der Nachbarschaft.

Umbenennungen von Siedlungen im Laufe des 20. Jahrhunderts, die nach wenigen Jahren erneut umbenannt wurden.

Bei orthographischen Namensvarianten wurde nur eine Auswahl getroffen. Nicht berücksichtigt wurden auch offenkundige Verschreibungen.

Dem alphabetischen Ordnungsbuchstaben vorangesetzt wurden: H. (für Hagia, Hagioi, Hagios), Hos. (für Hosios), Sv. (für Sveta, Sveti), S. (für Sancta, Sanctus, Sancti, San, Santa). Aja, Ajo, Aya, Ayo (z. B. Aya Maryana, Ayo Yorgi) und Ad hingegen wurden im geographischen Register als alphabetische Ordnungsbuchstaben behandelt.

Abalı (Popli) 889

Abanlēdes, aktuell Prinochōrion (Krya Pēgadia) 627

Abanoglu, mezraa (Gomatu [I]) 454
